What went well?

Things we are happy about.

- Tasks are tracked on Trello 1
- the tracking of tasks and the information interchange become better
- Have a few demo videos ready to present 1
- Deadlines were better met for documentation 1
- Presentation artifacts were designed on time 1
- Fully prepared for final presentation 1
- Finally have depth camera working for distance estimation
- All members of the team have made certain contributions
- Improved meeting minutes documentations
- we finish work before the deadline
- Good communication with client
- Managed to roughly finish major epics
- Development details are documented
- Preparation for meetings was done well

What went less well?

Things we should improve.

- Participation in team meetings 3
- One team members often absent from meetings
- Stop make meaningless edits on Confluence 4
- Someone didn't treat this project seriously 1
- Not follow github workflow and commit on main branch directly 1
- Specialisation of modules made communication within the team difficult
- Task tracking between members could have been better
- Should have more time for code review
- Time management for tasks

What do we want to try next?

Things we should do differently.

- Everyone put efforts on handover preparation 1
- Start prepare documentations early 1

What puzzles us?

Unanswered questions we have.
